## **How To ELIMINATE Your Hair Loss: The 3 Easy Steps You NEED To Follow...**

Whether you're a man or a woman...

YOU CAN put a stop to your hair loss...

But sometimes the hardest part is just getting started...

So, just follow these 3 EASY STEPS and you'll be on your way to regrowing your hair....

### **Step 1: Determine The Cause Of Your Hair Loss...**

## Promote Hair Growth Now!

---

There are a number of hair loss treatments out there, but to get the best RESULTS...

...you need to focus on solutions that fit the primary cause of your hair loss in the first place.

Now, the most common form of hair loss in men and women is when...

...the testosterone in your body converts to something called dihydrotestosterone or DHT.

When your body produces too much DHT, it begins to attack your hair follicles causing them to become inflamed and shrink.

When this happens, your hair starts to thin, and when left untreated, your hair loss continues to get worse.

You can read more about DHT and other [common causes of hair loss by clicking this link](#).

## Step 2: Pick An EFFECTIVE Hair Loss Treatment...

There are a number of hair loss treatments available today, and because of this, I've narrowed them down in to the following two categories...

- Scientifically Designed Hair Loss Treatments
- Natural Remedies For Hair Loss

## Scientifically Designed Hair Loss Treatments...

There are many scientifically designed hair loss treatments on the market today...

but some can carry with them extremely unpleasant and unwanted side-effects.

This is why it's incredibly important to educate yourself before trying a solution.

Now, there are some effective treatments available that do not carry with them severe side effects...

And the one I RECOMMEND MOST is a hair growth product called Provillus.

It's SAFE, POWERFUL, and CLINICALLY PROVEN to help regrow hair, and if you're interested...
